AMBITION
COALITION
FOR NATURE & PEOPLE

A COORDINATED
APPROACH TO
MATCHMAKING
FOR NATURE

ONE REQUEST.
TWO NETWORKS.
GREATER IMPACT.

WORKING TOGETHER TO DELIVER THE GLOBAL BIODIVERSITY FRAMEWORK

The NBSAP Accelerator Partnership and the High Ambition Coalition for Nature and People both support countries in delivering the Global Biodiversity Framework by connecting national needs with technical and financial assistance. Their matchmaking approach, driven by countries and their needs, bridges the gap between requests for support and available expertise and resources.

WHAT IS MATCHMAKING?

Matchmaking is the process of connecting country requests with the most relevant providers, including technical experts, financial partners, and implementation networks, ensuring timely, tailored support aligned with biodiversity priorities.

WHY WE ARE JOINING FORCES

- **Save time** – Less work for countries with faster responses.
- **Double the reach** – One request connects countries to both provider networks.
- **Streamline the process** – No need for duplicate submissions or follow-ups.
- **Maximize results** – Greater visibility and more matches to deliver Global Biodiversity Framework targets.
- **Act with urgency** – With less than five years to 2030, coordinated and efficient action is essential to meet global targets

HOW WE WORK TOGETHER

01

Receive & assess

Countries submit matchmaking requests through HAC for N&P or the NBSAP AP.

02

Share & distribute

Relevant requests are exchanged between the two initiatives. HAC for N&P supports Global Biodiversity Framework Target 3 (30 x 30), while the NBSAP AP focuses on the other 22 targets.

03

Coordinate & streamline

Both initiatives remain engaged throughout the process, ensuring coordination and efficient support.

04

Match & follow-up

Once a match is made, both initiatives work together to track progress.

No matter where a request begins—through High Ambition Coalition for Nature and People or through the NBSAP Accelerator Partnership—it benefits from a wider network of technical, financial and capacity-building providers, increasing visibility and likelihood of securing support through our coordinated approach.

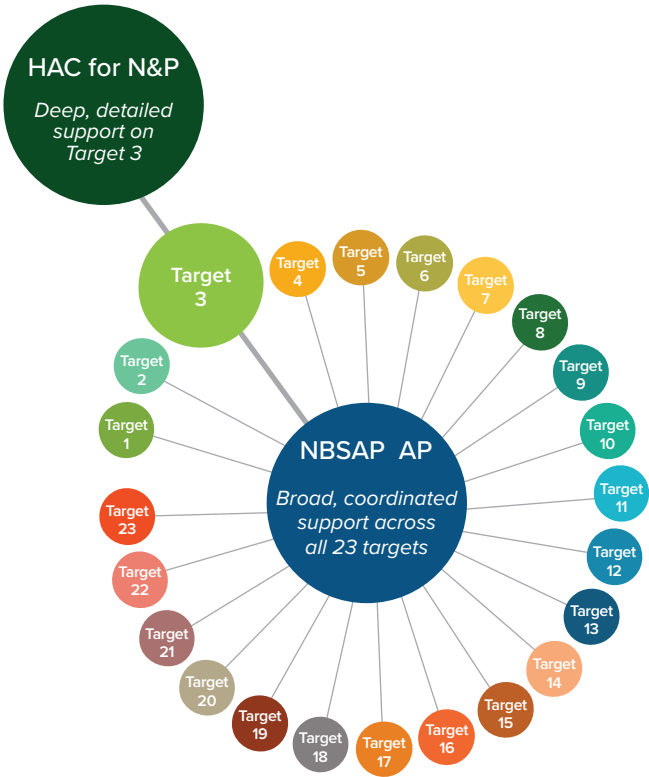

WHO WE ARE

The High Ambition Coalition for Nature and People

(HAC for N&P) is an intergovernmental group of 122 countries committed to the global agreement of protecting at least 30% of the planet’s land and ocean by 2030 (GBF Target 3, also known as the ‘30x30’ target).

The NBSAP Accelerator Partnership

(NBSAP AP) is a country-led, global initiative that supports countries in implementing National Biodiversity Strategies and Action Plans (NBSAPs) to achieve the goals and targets of the Kunming-Montreal Global Biodiversity Framework.
